

ADVANTAGES OF THERMOPLASTIC PROTECTION

- Improved sliding friction - Resulting in less wear between metal parts, particularly during swivelling action.
- Minimum lubrication required. (Initial lubrication will significantly increase the lifespan of the fifth wheel.)
- Cost Savings - The lifespan of the metal fifth wheel is significantly extended due to lower friction and wear.
- Time Saving - The fifth wheel cover can be changed in 5 minutes. The cover stays on the trailer, and does not need to be changed when trailers are changed.
- Light weight – Approximately 1/7 that of steel.

DELIVERY PROGRAMME

PREMIUM (UHMWPE)

High Impact Strength,
Excellent Chemical Resistance,
Excellent abrasion and wear resistance,
No Corrosion and Longer Life Span

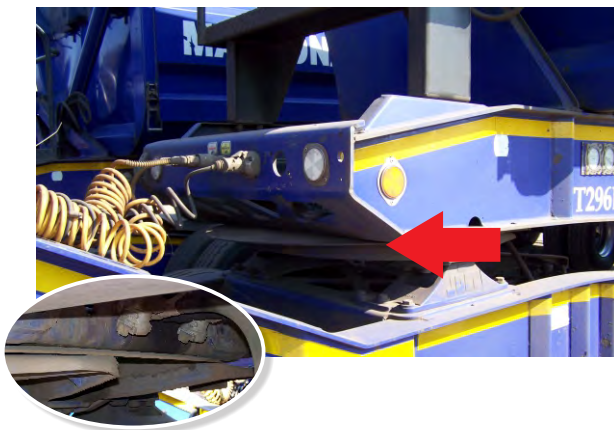

ECO (G HDPE)

UV Stable (Black)
Good Chemical Resistance
Low Weight with No Corrosion
Extremely low coefficient of friction

“GREASELESS” 5TH WHEEL PROTECTION

LESS WEAR | NO LUBRICATION | SAVES MONEY

NATIONAL DISTRIBUTION - STOCK SHAPES 086 1100 420
