

## ENGINEERING PLASTIC PRODUCTS

# FORESTRY | TIMBER INDUSTRY SOLUTIONS

### THE ADVANTAGES OF THERMOPLASTICS

- Plastics are light weight, especially when compared to metals.
- Durable and corrosion resistant.
- Low Friction and Low Wear – increases part life and results in less down time.
- Cost effective – overall very economical to produce.
- Self-lubricating properties. This saves costs eliminating the use of lubrication fluids. External lubrication also causes problems with dust and grease build-up.
- Resistant to environmental decay – will not rot, swell, splinter or degrade.

### APPLICATIONS

Linings, Guide profiles, Drive connectors, Slide shoes, Slide bushings, Wear blocks, Wear bars, Bin protectors, Sight glasses and windows for timber mills, Felling wedges, Log carriers, Chainsaw holders, Cable sheaves, Parts for cable guide brace systems.

NATIONAL DISTRIBUTION - STOCK SHAPES 086 1100 420

**SPECIALIST ENGINEERING PLASTICS BRANCH**  
Tel: +27(11) 568-4000 | Fax: +27 (11) 568-4970  
Email: [eppsales@maizey.co.za](mailto:eppsales@maizey.co.za)

**MACHINED COMPONENTS AND INDUSTRIAL FABRICATION**  
Tel: +27(11) 824-2751 | Fax: +27 (11) 824-1829
