

WALL CLADDING ANTIMICROBIAL TROBLOC®

PVC THERMOPLASTICS PROVES TO BE “BUG” PROOF

TroBloc® M and F is a true wall cladding solution that prevent microbes, bacteria, viruses and moulds that come in contact with the surface from proliferating. This antimicrobial effect is achieved without the use of toxins, biocides or antibodies.

TroBloc® M - Antimicrobial Wall Covering | Prevention and control of multi drug-resistant bacteria in medical facilities

Whenever weak patients come into contact with germs, their safe treatment and rapid recovery are put at risk. That is why top hygiene standards are required in hospitals, GP surgeries and care homes. TroBloc® M prevents the spread of bacteria, viruses, mould and even MRSA (methicillin-resistant Staphylococcus aureus) without using toxins or antibiotics. Surfaces are easy to clean with standard cleaning agents, supporting medical staff's efforts to maintain top hygiene standards.

Applications: Wall cladding in sick rooms, surgeries, hospital corridors, nursing homes, pharmaceutical companies, medical practices.

TroBloc® F - Antimicrobial Wall Covering | Safe production and processing of food.

The prevention and control of bacteria is of great importance in food processing areas. The antimicrobial action of TroBloc® F wall covering prevents microbes, including Escherichia coli, from being able to multiply on the surface although no toxins or antibiotics are used in the material. TroBloc® F makes it easier to meet top hygiene standards, ensuring a safer and more hygienic production environment for processing of food.

Applications: Covering for walls, ceilings, doors and surfaces in food production and food packaging, meat and poultry processing, beverage industry, catering environments, dairy industry, canteen kitchens.

PROPERTIES

- Antimicrobial effect against MRSA – TroBloc® M
- Antimicrobial effect against Escherichia Coli – TroBloc® F
- Constant, long-lasting effect caused by non migration of active ingredient
- High chemical resistance. (Won't be effected by cleaning agents.)
- Extremely scratch resistant.
- Dirt repellent and easily to clean.
- Can be glued on the reverse side and seamlessly installed. (No gaps like with tiled surfaces.)
- Can be bent at 90° angles for a seamless fit around corners as well.

Easy-to-clean-effect:
With TroBloc, even large surface areas can be cleaned fast. Fluid runs off immediately, taking adherent substances and particles with it.
